ACADEMIC LECTURE

Dr. Allen LEE
Assistant Professor
Department of Psychiatry
CUHK

Date: 23 Feb 2023 (THU)
Time: 14:30 - 16:00
Venue: To be held by Zoom

Topic: Cognitive Interventions for Older Adults

Abstract:

One in three residents in Hong Kong will be aged 65 years or older in 20 years. With age being the greatest risk factor for dementia, and cost-effective disease-modifying treatment now lacking, failure to understand dementia or identify ways to prevent its clinical manifestations could have serious health implications and pose significant burden to the society.

Building on top of our epidemiological findings of intellectual activity participation potentially reducing dementia risk, we have embarked on randomized controlled trials to test whether cognitive training improves mood and cognition in older adults at risk of dementia. I will be sharing the latest findings of our research work, highlighting the clinical and scientific evidence of cognitive training in achieving cognitive maintenance and healthy ageing.

Biography:

Dr. Allen Lee is actively involved in cross-disciplinary evidence-based research on non-pharmacological interventions for prevention and treatment of dementia and late-life depression. He is holding as PI/Co-PI over \$23M research funding. He has published as the lead author in top psychiatric and geriatric journals such as JAMA Psychiatry and Age and Ageing. In 2022, he was invited to contribute a chapter in the World Alzheimer Report published by the Alzheimer's Disease International (ADI) and to present in the Alzheimer's Association International Conference (AAIC 2022) held in the USA with 10,000 attendances. His publications received high attention scores, with worldwide media coverage (including the TIME magazine and Consumer Reports) and professional recognitions (his work was included as CME in JAMA Network Learning, reported by the NEJM Journal Watch, and cited in the 2020 Lancet Commission Report on Dementia). He has been serving as a reviewer for various peer-reviewed journals such as Alzheimer's & Dementia and International Psychogeriatrics, the Vice President of the Chinese Dementia Research Association (CDRA) since 2018, and the Council member of the Hong Kong College of Psychiatrists since 2021. He was awarded the Distinguished Young Fellow by the Hong Kong Academy of Medicine in 2017 and the Doctor of Medicine (MD) by CUHK in 2022.

Registration is required. For enquiries, please contact pci-event-app@cuhk.edu.hk or 26076025.
Please display the registration name for joining the Zoom lecture.
